

Bristol Energy Committee
Feb. 7, 2011

Present: Nathan Haselbauer, George Corrette, Lucille Keegan, Michael Capone

There is an Energy Inventory Tool webinar scheduled for Feb. 15. George can take the place vacated by Michelle Bonsteel.

Nathan will contact Ray to have an announcement of the presentation to Mark Bucklin of the Hero of Energy Conservation Award posted in the Town Crier.

The committee discussed developing a mulching program at the transfer station.

Michael knew of such a program in Canaan and will gather information.

It was noted that the CIP has recommended \$35,000 be put aside for upgrades to the Old Town Hall. The TV equipment stored there requires that the heat be kept on through the winter months.

Michael reported that the street light upgrades are complete.

The Idling Policy letter presented to the selectmen is being circulated to departments and will be addressed after town meeting.
