

Bristol Energy Committee
April 4, 2011

Present: Nathan Haselbauer, George Correttee, Lucille Keegan, Michael Capone
Absent: Don Martin, Don Downes

A discussion was held about ways to encourage local citizens to save energy. We will place tips in the Crier. Earth Day was mentioned and the idea of doing something community wide next year was explored. This would require advanced planning. Lucille mentioned another environmental event which takes place in the fall, 350.org. We could show a movie and have a discussion group. One movie idea is Crude Awakening. Nathan will contact the Bristol Conservation Commission about possible roadside cleanup and planting of trees.

Michael reported that the new street lights are saving energy and money.
