

Bristol Energy Committee

July 9, 2013

The Bristol Energy Committee met at the Town Office Building at 10 AM. Members present were Bill Dowey, Michael Farnswort and Lucille Keegan. Michael Capone joined a little later.

Bill brought the group up to date on the solar installation for the library. It should be up and running by the end of July.

He spoke about the possibility of holding a Button up NH workshop in Bristol. We discussed the number of home owners versus rentals and whether or not the attendance potential would be enough to support such a meeting. Bill will check with Plymouth to see how well their workshop was attended.

Michael will be moving out of town soon. We appreciate his participation on the committee. We will be advertising for more members.

Bill is going to look into having a group from Portsmouth come to a meeting to discuss the potential for partnering on solar projects.

He reported that the state has raided some of the PUC alternative energy funds. We have applied for a grant for the study of a large solar project for the town.

Next meeting: Tuesday, August 6 at 10 AM

Lucille Keegan, secretary
