

BRISTOL ENERGY COMMITTEE
NOV. 1, 2010

Members present: Don Martin, Nathan Haselbauer, Michelle Bonsteel, Lucille Keegan
Absent: George Correttee, Don Downes

The Energy Committee met and discussed a number of issues with follow ups on previously explored ideas. Michael Capone is in the process of supplying the paper work necessary to work with CFL Ventures, Inc and the Energy Inventory Tool. We are hopeful that this process will move quickly and the town building inventory walk through will occur soon.

Nathan will work with Ray Courchane to add more information to the committee's website.

Michelle reported that she feels the police and budget committee are open to the idea of a grant through Harley Davidson for a motorcycle to be used in place of a cruiser during good weather.

It was reported that the library is back to the planning phase for expansion. This committee strongly favors some form of alternative energy for this project. Nathan will be introducing the concept of geothermal to the library trustees.

Don Martin will write a letter to the select board urging the adoption of an anti-idling policy for all town vehicles.

Nathan will now be the chair and Lucille will be the secretary of this committee.
